

Owner: Teresa Sweeney

Patient: Just David

Date: 5/28/2021

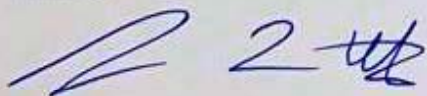

Account: 156204

Parameter	Range	Patients Value
VSd (cm)	0.28-0.60	0.49
VSs (cm)	0.40-0.90	0.85
AO (cm)	0.40-1.18	0.77
LA (cm)	0.45-1.12	1.09
LA/AO		1.41

Comments: The echocardiogram(s) performed on the above patient(s) appeared to be within normal limits and no evidence of cardiac disease was noted.

IVD-D is the intraventricular diameter during diastole. LA/AO is the measurement of the left atrium to determine if there is enlargement. All cats measurements fall within normal range and show no evidence of hypertrophic cardiomyopathy.

Thanks,

Dr Hal Taylor III
